

About ISoP and Benefits of Membership

Key Benefits of ISoP Membership

- **FREE STUDENT MEMBERSHIPS!**
- **Extensive network** with leaders and peers in PMx
- **Exclusive webinars** on the latest scientific topics
- **Professional Development** training
- **Special Interest Groups** (SIGs) in focused scientific areas
- Discounts for ISoP's Journal ***Quantitative Medicine***
- **Leadership opportunities** in committees and working groups
- Global Community Program
- Dedicated **resources for Students** and Trainees
- ISoP Insider **Quarterly Newsletter**
- More to come!

ISoP's Official Journal

- Fully **open-access** online journal devoted to **advancing the development and application of quantitative methods in medicine**
- **QM** showcases a diverse range of scientific content, including but not limited to:
 - **Pharmacometrics**: Pharmaco-statistical, mechanistic, & systems biology/pharmacology modeling
 - **Simulation-Based Approaches**: Clinical trial simulations, digital twins
 - **AI/ML & Informatics**: Applications of artificial intelligence, machine learning & data science
 - **Integrated Evidence Synthesis**: Model-based meta-analyses, causal inference, real-world evidence, network analyses, & health economics & outcomes research
- Continuous publishing on **ScienceOpen**

Special Interest Groups

Shaping the future of AI/ML in pharmacometrics through collaboration, education and best practices

Elba Raimúndez^{1*}, Ana Victoria Ponce-Bobadilla^{2*}, Sven Stodtmann^{3*} and Jane Knöchel^{4*}

(1) Sanofi R&D, Translational Medicine Unit, Quantitative Pharmacology, Development Pharmacometrics, Frankfurt, Germany, (2) Certara, Radnor, PA, USA, (3) Abbvie Deutschland GmbH & Co. KG, Ludwigshafen, Germany, (4) Department of Drug Design and Pharmacology, University of Copenhagen, Copenhagen, Denmark (*) on behalf of AI/ML SIG Steering Committee

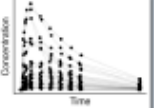

CURRENT CHALLENGES

- Rapid AI/ML uptake in pharmacometrics
- Need for regulatory alignment
- Lack of standardized evaluation practices
- Critical gaps in reproducibility
- No universal benchmarking

Perspective published in CPT:PSP, 2025

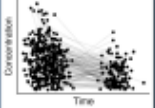

Method development

Synthetic data:

- balanced
- structured
- clean
- no missing values
- Gaussian

Method Application

Real data:

- missing values
- drop-out
- missed doses or irregular sampling
- skewed distributions
- inconsistencies

Model accuracy

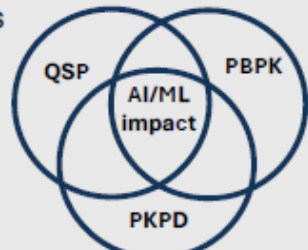

ROADMAP

- March 2025: AI in Clinical Pharmacology Workshop
- April 2025: First contact ISO-P
- June 2025: Kick-off meeting with ISO-P
- July 2025: Perspective submission to CPT:PSP
- September 2025: ISO-P Boards approves new SIG
- October 2025: AI/ML SIG announcement at ACoP
- November 2025: Perspective publication in CPT:PSP
- February 2026: Public announcement of initial AI/ML SIG leadership
- June 2026: First on-site workshop at PAGE meeting

OUR OBJECTIVES

- ✓ Enable and promote responsible and rigorous AI/ML methodologies in pharmacometrics
- ✓ Create and maintain benchmarking datasets
- ✓ Establish and disseminate best practices
- ✓ Foster multidisciplinary community
- ✓ Support education and outreach across the community

Core Workstreams

- Technical Innovation & Best Practices
- Education, Outreach, Publications
- Ethical AI & Regulatory Readiness

Working Groups

- **Benchmark datasets**
lead: Sven Stodtmann
- **Agentic Workflows**
leads: Ari Pritchard-Bell and Peter Bloomingdale

INTERESTED IN JOINING?

-  **Learn:** Stay updated on AI/ML developments
-  **Contribute:** Join working groups
-  **Share:** Provide datasets
-  **Lead:** Shape best practices

When?

- Poster Session II
- Wednesday, June 3, 2026
- 3:20 PM – 4:50 PM

Join the AIML SIG!
